This marketing communication is directed at Institutional clients in the UK and Professional investors in Jersey and Guernsey. Investors should read the legal documents prior to investing.

Summary of fund objective

The objective of the Fund is to achieve long-term capital growth. The Fund intends to achieve its objective by investing primarily in a concentrated portfolio of global equities issued by companies that, in the view of the Investment Manager, are geared towards the growth of the Metaverse, which is underpinned by developments in Artificial Intelligence and thus help facilitate, create, or benefit from, immersive virtual worlds for both consumers and enterprises. For the full objectives and investment policy please consult the current prospectus.

Investment risks

For complete information on risks, refer to the legal documents. The value of investments and any income will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested. The fund may invest in certain securities listed in China which can involve significant regulatory constraints that may affect the liquidity and/or the investment performance of the fund. The fund invests in a limited number of holdings and is less diversified. This may result in large fluctuations in the value of the fund. As this fund is invested in a particular sector, you should be prepared to accept greater fluctuations in the value of the fund than for a fund with a broader investment mandate. As a portion of the Fund may be exposed to less developed countries, you should be prepared to accept large fluctuations in the value of the Fund.

Fund Strategy

The fund seeks to invest in undervalued companies that help facilitate, create or benefit from the metaverse - a network of highly immersive virtual worlds for both consumers and enterprises. The fund managers take a fundamental approach to stock selection, with a focus on cash flow, balance sheet strength and business model sustainability. It will typically hold 30 to 50 stocks, diversified across the metaverse value chain.

*At Invesco we continuously monitor any applicable sanctions, including those imposed by the UN/US/EU and UK. These sanctions may preclude investments in the securities of various governments/regimes/entities and as such will be included in our compliance guidelines and workflows (designed to ensure compliance with such sanctions). The wording of international sanctions is something that we pay particular attention to as there are occasions where sanctions can exist in limited form, for example allowing investments in the secondary market. In addition to sanctions targeting entire countries, there are other thematic regimes, which may focus for example on human rights, cyber attacks, terrorist financing and corruption, which may apply to both individuals and/or entities/corporations.
