## What is this product?

### Type

The Fund is a sub-fund of Invesco Funds (the "Umbrella Fund"), an open-ended umbrella investment fund established under the laws of Luxembourg and harmonised under the EU Council Directive 2009/65/EC relating to Undertakings for Collective Investment in Transferable Securities (UCITS).

### Term

The Fund does not have a maturity date and may only be terminated in accordance with the terms set out in the Prospectus.

### Objectives

- The Fund aims to generate income, together with long term capital growth.
- The Fund invests in debt instruments of issuers which are economically tied to emerging market countries and which are denominated in local currencies.
- The Fund invests in at least three emerging market countries.
- Debt instruments includes but are not limited to debt instruments issued by companies and governments.
- The Fund may invest in debt instruments which are in financial distress (distressed securities).
- The Fund may make significant use of derivatives (complex instruments) in order to (i) reduce the risk and/or generate additional capital or income and/or (ii) meet the Fund's investment objectives by generating varying amounts of leverage (i.e. where the Fund gains market exposure in excess of the net asset value of the Fund).
- The Fund is actively managed and is not constrained by its benchmark, the JP Morgan GBI-EM Global Diversified Composite Index (Total Return), which is used for comparison purposes. However, as the benchmark is a suitable proxy for the investment strategy, it is likely that the majority of the issuers in the Fund are also components of the benchmark. As an actively managed fund, this overlap will change and this statement may be updated from time to time.
- The Fund has broad discretion over portfolio construction and therefore it is expected that over time the risk return characteristics of the Fund may diverge materially to the benchmark.
- The Fund promotes environmental, social and governance (ESG) criteria as covered under Article 8 of the Regulation (EU) 2019/2088 on sustainability-related disclosures in the financial services sector.
- You can buy and sell shares in the Fund on any Dealing Day (as defined in the Prospectus).
- Any income from your investment will be reinvested.

### Intended Retail Investor

The Fund is intended for investors aiming for income and long term capital growth. The Fund is intended for investors who may not have specific financial expertise but are able to make an informed investment decision based on this document and the Prospectus, and have a risk appetite consistent with the risk indicator displayed below and understand that there is no capital guarantee or protection (100% of capital is at risk).

## What are the risks and what could I get in return?

### Risk Indicator

The risk indicator assumes that you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is a medium-low risk class.

This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact the capacity of the PRIIPs manufacturer to pay you.

**Be aware of currency risk. In some circumstances, you may receive payments in a different currency from your local currency, so the final return you will get may depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.**

Other risks such as Liquidity, Distressed Securities, Contingent Convertibles, Bond Connect, ESG and Derivatives risks may impact the Fund. Please refer to the Prospectus for more details.

This product does not include any protection from future market performance so you could lose some or all of your investment.

## Performance Scenarios

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

In addition, The Bank of New York Mellon SA/NV, Luxembourg Branch, as the depositary of Invesco Funds (the "Depositary"), is responsible for the safekeeping of the assets of the Fund. To that effect, if Invesco Management S.A. defaults, there will be no direct financial impact on the Fund. **The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.**

### Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year, you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- EUR 10,000 is invested.

|------------------------|--------------------------|---------------------------|
| Total costs            | 633 EUR                  | 1,272 EUR                 |
| Annual cost impact (*) | 6.3%                     | 2.4% each year            |

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 2.8% before costs and 0.4% after costs.
