Key Investor Information

Invesco Global Health Care Innovation Fund (the "Fund")
A sub-fund of Invesco Funds (the "Umbrella Fund")
Class C annual distribution - USD (ISIN: LU1775952176) (the "Share Class")

The Fund is managed by Invesco Management S.A., part of the Invesco Group.

Objectives and Investment Policy

- The objective of the Fund is to achieve long-term capital growth.
- The Fund will invest primarily in shares of innovative healthcare companies worldwide.
- For the purpose of the Fund, healthcare companies include (but are not limited to), pharmaceuticals, biotechnology, healthcare services and medical technology and supplies.
- The Fund seeks to invest in companies that have the potential to materially improve the quality of care, access to care or cost of care through their innovative approach to products and services, use of technology, processes and business models, or management.
- The Fund may use derivatives (complex instruments) to manage the Fund more efficiently, with the aim of reducing risk, reducing costs and/or generating additional capital or income.
- The Fund is actively managed and is not constrained by its benchmark, MSCI World Health Care Index (Net Total Return), which is used for comparison purposes. However, the majority of the Fund's holdings are likely to be components of the benchmark. As an actively managed fund, this overlap will change continuously and this statement may be updated from time to time.
- The Fund has broad discretion over portfolio construction and therefore securities, weightings and risk characteristics will differ. As a result, it is expected that over time the risk return characteristics of the Fund may diverge materially to the benchmark.
- Please refer to the Past Performance section below where a benchmark will be displayed if relevant.
- You can buy and sell shares in the Fund on any Dealing Day (as defined in the Prospectus).
- Any income from your investment will be paid annually.

Risk and Reward Profile

Lower Risk — Higher Risk

Typically lower rewards — Typically higher rewards

1	2	3	4	5	**6**	7

- The Share Class is in risk category 6 due to the rises and falls of its price or simulated data in the past.
- As the Share Class' risk category has been calculated using historical data, it may not be a reliable indication of the Share Class' future risk profile.
- The risk category may change in the future and is not guaranteed.
- The lowest category does not mean a risk free investment.

Other Risks

- The value of investments, and income from them, can go down as well as up and you may not get back the full amount you invested.
- Shares of companies are generally considered high risk investments and may result in fluctuations in the value of the Fund due to external factors.
- As this Fund is invested in a particular geographical region, you should be prepared to accept greater fluctuations in the value of the Fund than for a fund with a broader geographical investment mandate.
- As this Fund is invested in a particular sector, you should be prepared to accept greater fluctuations in the value of the Fund than for a fund with a broader investment mandate.
- The Fund may use derivatives (complex instruments) in an attempt to reduce the overall risk of its investments or reduce the costs of investing, although this may not be achieved. The use of derivatives transactions may expose the Fund to counterparty risks that may result in losses to the Fund associated with the bankruptcy or insolvency of a counterparty.
- A more detailed description of risk factors that apply to this Fund is set out in Section 8 of the Prospectus.
