What is this product?

Type

The Fund is a sub-fund of Invesco Funds (the "Umbrella Fund"), an open-ended umbrella investment fund established under the laws of Luxembourg and harmonised under the EU Council Directive 2009/65/EC relating to Undertakings for Collective Investment in Transferable Securities (UCITS).

Term

The Fund does not have a maturity date and may only be terminated in accordance with the terms set out in the Prospectus.

Objectives

- The objective of the Fund is to achieve long-term capital growth.
- The Fund intends to invest primarily in shares of small companies worldwide.
- For the purposes of the Fund, small companies shall mean companies with a market capitalization lower than the largest company in the MSCI ACWI Small Cap Index.
- The Fund may use derivatives (complex instruments) to manage the Fund more efficiently, with the aim of reducing risk, reducing costs and/or generating additional capital or income.
- The Fund is actively managed and is not constrained by its benchmark, the MSCI AC World Small Cap Index (Net Total Return), which is used for comparison purposes. However, the majority of the Fund's holdings are likely to be components of the benchmark. As an actively managed fund, this overlap will change and this statement may be updated from time to time.
- The Fund has broad discretion over portfolio construction and therefore securities, weightings and risk characteristics will differ. As a result, it is expected that over time the risk return characteristics of the Fund may diverge materially to the benchmark.
- Please refer to the past performance of the Fund published on the website of Invesco Management S.A, where a benchmark will be displayed if relevant.
- The Fund promotes environmental, social and governance (ESG) criteria as covered under Article 8 of the Regulation (EU) 2019/2088 on sustainability-related disclosures in the financial services sector.
- You can buy and sell shares in the Fund on any Dealing Day (as defined in the Prospectus).
- Any income from your investment will be paid annually.

Intended Retail Investor

The Fund is intended for investors aiming for long term capital growth, who may not have specific financial expertise but are able to make an informed investment decision based on this document and the Prospectus, and have a risk appetite consistent with the risk indicator displayed below and understand that there is no capital guarantee or protection (100% of capital is at risk).

What are the risks and what could I get in return?

Risk Indicator

The risk indicator assumes that you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class.

This rates the potential losses from future performance at a medium level, and poor market conditions could impact the capacity of the PRIIPs manufacturer to pay you.

Be aware of currency risk. In some circumstances, you may receive payments in a different currency from your local currency, so the final return you will get may depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Other risks such as Liquidity, Stock Connect, ESG and Derivatives risks may impact the Fund. Please refer to the Prospectus for more details.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance Scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

What happens if Invesco Management S.A. is unable to pay out?

The assets of the Fund are segregated from those of Invesco Management S.A. In addition, The Bank of New York Mellon SA/NV, Luxembourg Branch, as the depositary of Invesco Funds (the "Depositary"), is responsible for the safekeeping of the assets of the Fund. To that effect, if Invesco Management S.A. defaults, there will be no direct financial impact on the Fund.
