Risk and Reward Profile

Lower Risk ← Higher Risk
Typically lower rewards ← Typically higher rewards

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- The Share Class is in risk category 7 due to the rises and falls of its price or simulated data in the past.
- As the Share Class' risk category has been calculated using historical data, it may not be a reliable indication of the Share Class' future risk profile.
- The risk category may change in the future and is not guaranteed.
- The lowest category does not mean a risk free investment.

Other Risks

- The value of investments, and income from them, can go down as well as up and you may not get back the full amount you invested.
- The Fund will use Stock Connect to access China A Shares traded in Mainland China. This may result in additional liquidity risk and operational risks including settlement and default risks, regulatory risk and system failure risk.
- Shares of companies are generally considered high risk investments and may result in fluctuations in the value of the Fund due to external factors.
- Return on your investment may be adversely affected by variations in exchange rates.
- It may be difficult for the Fund to buy or sell certain instruments in stressed market conditions. Consequently the price obtained when selling such instruments may be lower than under normal market conditions.
- As this Fund is invested in a particular geographical region, you should be prepared to accept greater fluctuations in the value of the Fund than for a fund with a broader geographical investment mandate.
- The Fund invests in a limited number of holdings and is less diversified. This may result in large fluctuations in the value of the Fund.
- The Fund may use derivatives (complex instruments) in an attempt to reduce the overall risk of its investments or reduce the costs of investing, although this may not be achieved.
- As a large portion of the Fund is invested in less developed countries, you should be prepared to accept significantly large fluctuations in the value of the Fund.
- This Share Class is denominated in a different currency than the base currency of the Fund and is not intended to be hedged. Therefore, return on your investment may be adversely affected by variations in exchange rates between the two currencies.
- A more detailed description of risk factors that apply to this Fund is set out in Section 8 of the Prospectus.
