

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Invesco Sustainable Global Structured Equity Fund (the "Fund") A sub-fund of Invesco Funds (the "Umbrella Fund") Class A monthly distribution-1 - HKD (ISIN: LU2401542001) (the "Share Class")

The Fund is managed by Invesco Management S.A., part of the Invesco Group.

Objectives and Investment Policy

- The objective of the Fund is to achieve long-term capital growth.
- The Fund invests primarily in shares of companies worldwide, which meet the Fund's environmental, social and governance (ESG) criteria with a particular focus on environmental issues.
- The Fund is managed using "quantitative methods". "Quantitative methods" are defined as mathematical, logical and statistical techniques used for stock selection purposes.
- The Fund's ESG criteria will be based on a set of screening thresholds determined by the investment manager, which will be reviewed and applied on an ongoing basis. These criteria will be integrated as part of the "quantitative methods" for stock selection and portfolio construction.
- Positive screening will also be used based on an integrated-best-in-class approach to identify issuers, which in the view of the investment manager meet sufficient practice and standards in terms of transition to a lower carbon economy for inclusion in the Fund's universe, as measured by their ratings relative to their peers using a third party score.
- Screening will also be employed to exclude securities issued by issuers which derive or generate a pre-determined level of revenue or turnover from activities such as (but not limited to) fossil fuel industries, activities related to coal or nuclear power, extraction of tar sands and oil shale, fracking or arctic drilling activities. Please refer to the Appendix A of the Prospectus for more details on the Fund's exclusions list.
- The Fund is actively managed and is not constrained by its benchmark, the MSCI World Index USD (Net Total Return), which is used for comparison purposes. However, the majority of the Fund's holdings are likely to be components of the benchmark. As an actively managed fund, this overlap will change and this statement may be updated from time to time.
- The Fund has broad discretion over portfolio construction and therefore securities, weightings and risk characteristics will differ. As a result, it is expected that over time the risk return characteristics of the Fund may diverge materially to the benchmark.
- Please refer to the Past Performance section below where a benchmark will be displayed if relevant.
- You can buy and sell shares in the Fund on any Dealing Day (as defined in the Prospectus).
- Any income from your investment will be paid monthly.

Risk and Reward Profile

- The Share Class is in risk category 6 due to the rises and falls of its price or simulated data in the past.
- As the Share Class' risk category has been calculated using historical data, it may not be a reliable indication of the Share Class' future risk profile.
- The risk category may change in the future and is not guaranteed.
- The lowest category does not mean a risk free investment.

Other Risks

- The value of investments, and income from them, can go down as well as up and you may not get back the full amount you invested.
- The lack of common standards may result in different approaches to setting and achieving ESG objectives. In addition, the respect of the ESG criteria may cause the Fund to forego certain investment opportunities.
- Shares of companies are generally considered high risk investments and may result in fluctuations in the value of the Fund due to external factors.
- Return on your investment may be adversely affected by variations in exchange rates.
- The Fund may use derivatives (complex instruments) in an attempt to reduce the overall risk of its investments or reduce the costs of investing, although this may not be achieved.
- This Share Class is denominated in a different currency than the base currency of the Fund and is not intended to be hedged. Therefore, return on your investment may be adversely affected by variations in exchange rates between the two currencies.
- The Fund may distribute out of gross income and/or directly from capital, therefore this will result in a reduction of the capital and will constrain future capital growth.
- A more detailed description of risk factors that apply to this Fund is set out in Section 8 of the Prospectus.
