Invesco Metaverse Fund (the "Fund")
A sub-fund of Invesco Funds (the "Umbrella Fund")
Class A (CZK hedged) accumulation - CZK (ISIN: LU2484078758) (the "Share Class")

The Fund is managed by Invesco Management S.A., part of the Invesco Group.

Objectives and Investment Policy

- The Fund intends to achieve its objective by investing primarily in a concentrated portfolio of global shares issued by companies that, in the view of the Investment Manager, are geared towards the growth of the Metaverse and thus help facilitate, create, or benefit from, immersive virtual worlds for both consumers and enterprises.
- This comprises companies of any market capitalisation, that are involved in businesses such as but not limited to, IT software and hardware, physical and virtual infrastructures, digital payments, digital content and assets, identity services and that are involved in the development and the support of the Metaverse infrastructure and its virtual experience.
- Metaverse is defined as a virtual-reality space in which users can interact with a computer-generated environment and other users.
- The Fund is actively managed and is not constrained by its benchmark, the MSCI AC World Index (Net Total Return), which is used for comparison purposes. However, the majority of the Fund's holdings are likely to be components of the benchmark. As an actively managed fund, this overlap will change and this statement may be updated from time to time.
- The Fund has broad discretion over portfolio construction and therefore securities, weightings and risk characteristics will differ. As a result, it is expected that over time the risk return characteristics of the Fund may diverge materially to the benchmark.
- Please refer to the Past Performance section below where a benchmark will be displayed if relevant.
- The Fund promotes environmental, social and governance (ESG) criteria as covered under Article 8 of the Regulation (EU) 2019/2088 on sustainability-related disclosures in the financial services sector.
- You can buy and sell shares in the Fund on any Dealing Day (as defined in the Prospectus).
- Any income from your investment will be reinvested.

Risk and Reward Profile

Lower Risk — Higher Risk

Typically lower rewards — Typically higher rewards

1	2	3	4	5	**6**	7

- The Share Class is in risk category 6 due to the rises and falls of its price or simulated data in the past.
- As the Share Class' risk category has been calculated using historical data, it may not be a reliable indication of the Share Class' future risk profile.
- The risk category may change in the future and is not guaranteed.
- The lowest category does not mean a risk free investment.

Other Risks

- The value of investments, and income from them, can go down as well as up and you may not get back the full amount you invested.
- Shares of companies are generally considered high risk investments and may result in fluctuations in the value of the Fund due to external factors.
- As a portion of the Fund may be exposed to less developed countries, you should be prepared to accept large fluctuations in the value of the Fund.
- Return on your investment may be adversely affected by variations in exchange rates.
- It may be difficult for the Fund to buy or sell certain instruments in stressed market conditions. Consequently the price obtained when selling such instruments may be lower than under normal market conditions.
- The Fund may use Stock Connect to access China A Shares traded in Mainland China. This may result in additional liquidity risk and operational risks including settlement and default risks, regulatory risk and system failure risk.
- As this Fund is invested in a particular sector, you should be prepared to accept greater fluctuations in the value of the Fund than for a fund with a broader investment mandate.
- The Fund invests in a limited number of holdings and is less diversified. This may result in large fluctuations in the value of the Fund.
- The Fund may use derivatives (complex instruments) in an attempt to reduce the overall risk of its investments or reduce the costs of investing, although this may not be achieved. The use of derivatives transactions may expose the Fund to counterparty risks that may result in losses to the Fund associated with the bankruptcy or insolvency of a counterparty.
- This Share Class is denominated in a different currency than that of the base currency of the Fund and may be hedged to mitigate against the effect of exchange rate fluctuations between the two currencies. However, this may not be achieved.
- A more detailed description of risk factors that apply to this Fund is set out in Section 8 of the Prospectus.
