

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Invesco US Equity Flexible Fund (the "Fund")

A sub-fund of Invesco Funds, SICAV (the "Umbrella Fund")

Class E (EUR hedged) accumulation - EUR (ISIN: LU1603799286) (the "Share Class")

The Fund is managed by Invesco Management S.A., part of the Invesco Group.

Objectives and Investment Policy

- The objective of the Fund is to achieve long-term capital growth while managing downside risk relative to traditional US equity indices.
- The Fund intends to invest primarily in shares of US companies.
- Depending on the market environment, the Fund may adjust the exposure to equities mainly through the use of derivatives (complex instruments).
- Where the Fund is positioned defensively, the exposure to equities could be reduced to 50% of its net asset value.
- The Fund is actively managed within its objectives and is not constrained by a benchmark.
- You can buy and sell shares in the Fund on any Business Day in Luxembourg (as defined in the Prospectus).
- Any income from your investment will be reinvested.

Risk and Reward Profile

- The Share Class is in risk category 4 due to the rises and falls of its price or simulated data in the past.
- As the Share Class' risk category has been calculated using historical data, it may not be a reliable indication of the Share Class' future risk profile.
- The risk category may change in the future and is not guaranteed.
- The lowest category does not mean a risk free investment.

Other Risks

- The value of investments, and income from them, can go down as well as up and you may not get back the full amount you invested.
- Shares of companies are generally considered high risk investments and may result in fluctuations in the value of the Fund due to external factors.
- The Fund may use derivatives (complex instruments) in an attempt to reduce the overall risk of its investments or reduce the costs of investing, although this may not be achieved.
- This Share Class is denominated in a different currency than that of the base currency of the Fund and may be hedged to mitigate against the effect of exchange rate fluctuations between the two currencies. However, this may not be achieved.
- As this Fund is invested in a particular geographical region, you should be prepared to accept greater fluctuations in the value of the Fund than for a fund with a broader geographical investment mandate.
- Return on your investment may be adversely affected by variations in exchange rates.
- A more detailed description of risk factors that apply to this Fund is set out in Section 8 of the Prospectus.
