Risk and Reward Profile

Lower Risk ← Higher Risk
Typically lower rewards ← Typically higher rewards

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- The Share Class is in risk category 3 due to the rises and falls of its price or simulated data in the past.
- As the Share Class' risk category has been calculated using historical data, it may not be a reliable indication of the Share Class' future risk profile.
- The risk category may change in the future and is not guaranteed.
- The lowest category does not mean a risk free investment.

Other Risks

- The value of investments, and income from them, can go down as well as up and you may not get back the full amount you invested.
- Changes in interest rates will result in fluctuations in the value of the Fund.
- The Fund may invest in distressed securities which carry a significant risk of capital loss.
- Debt instruments are exposed to credit risk which is the ability of the borrower to repay the interest and capital on the redemption date.
- Return on your investment may be adversely affected by variations in exchange rates.
- As the Fund may invest up to 100% of its net asset value in non-investment grade (lower quality) debt instruments, this may result in large fluctuations in the value of the Fund.
- It may be difficult for the Fund to buy or sell certain instruments in stressed market conditions. Consequently the price obtained when selling such instruments may be lower than under normal market conditions.
- The Fund may use derivatives (complex instruments) in an attempt to reduce the overall risk of its investments or reduce the costs of investing, although this may not be achieved.
- As a large portion of the Fund is invested in less developed countries, you should be prepared to accept significantly large fluctuations in the value of the Fund.
- This Share Class is denominated in a different currency than that of the base currency of the Fund and may be hedged to mitigate against the effect of exchange rate fluctuations between the two currencies. However, this may not be achieved.
- The Fund may distribute out of gross income and/or directly from capital to the extent that the Fund determines this will minimise the effect to the long-term capital preservation of the Fund. However, this is not guaranteed and therefore there is a risk of capital reduction.
- A more detailed description of risk factors that apply to this Fund is set out in Section 8 of the Prospectus.
