#### Other Risks

- As a large portion of the Fund is invested in less developed countries, you should be prepared to accept significantly large fluctuations in the value of the Fund.
- The Fund may use derivatives (complex instruments) in an attempt to reduce the overall risk of its investments or reduce the costs of investing, although this may not be achieved.
- The Fund invests in a limited number of holdings and is less diversified. This may result in large fluctuations in the value of the Fund.
- The Fund may invest directly in Russia, which can involve significant risks to capital.
- Return on your investment may be adversely affected by variations in exchange rates.
- It may be difficult for the Fund to buy or sell certain instruments in stressed market conditions. Consequently the price obtained when selling such instruments may be lower than under normal market conditions.
- A more detailed description of risk factors that apply to this Fund is set out in Section 8 of the Prospectus.
