---	---	---	---	---	---	---

- The Share Class is in risk category 7 due to the rises and falls of its price or simulated data in the past.
- As the Share Class' risk category has been calculated using historical data, it may not be a reliable indication of the Share Class' future risk profile.
- The risk category may change in the future and is not guaranteed.
- The lowest category does not mean a risk free investment.

Other Risks

- The value of investments, and income from them, can go down as well as up and you may not get back the full amount you invested.
- Shares of companies are generally considered high risk investments and may result in fluctuations in the value of the Fund due to external factors.
- Investment in instruments providing exposure to commodities is generally considered to be high risk which may result in large fluctuations in the value of the Fund.
- Return on your investment may be adversely affected by variations in exchange rates.
- As this Fund is invested in a particular geographical region, you should be prepared to accept greater fluctuations in the value of the Fund than for a fund with a broader geographical investment mandate.
- As this Fund is invested in a particular sector, you should be prepared to accept greater fluctuations in the value of the Fund than for a fund with a broader investment mandate.
- The Fund invests in a limited number of holdings and is less diversified. This may result in large fluctuations in the value of the Fund.
- The Fund may use derivatives (complex instruments) in an attempt to reduce the overall risk of its investments or reduce the costs of investing, although this may not be achieved.
- This Share Class is denominated in a different currency than that of the base currency of the Fund and may be hedged to mitigate against the effect of exchange rate fluctuations between the two currencies. However, this may not be achieved.
- A more detailed description of risk factors that apply to this Fund is set out in Section 8 of the Prospectus.
