What is this product?

Type

The Fund is a sub-fund of Invesco Funds (the "Umbrella Fund"), an open-ended umbrella investment fund established under the laws of Luxembourg and harmonised under the EU Council Directive 2009/65/EC relating to Undertakings for Collective Investment in Transferable Securities (UCITS).

Term

The Fund does not have a maturity date and may only be terminated in accordance with the terms set out in the Prospectus.

Objectives

- The objective of the Fund is to provide a positive total return over a market cycle with a moderate correlation to traditional emerging market debt indices.
- The Fund intends to gain exposure primarily to emerging market debt instruments (including convertibles) and currencies.
- The Fund will apply a risk management overlay in an effort to reduce risk.
- The Fund intends to gain exposure to commodities (excluding agricultural commodities) in an effort to reduce risk from exposure to currencies and emerging market debt instruments.
- The Fund intends to gain exposure to non-investment grade (lower quality) debt instruments, including debt instruments which are in financial distress (distressed securities).
- Depending on market conditions, the Fund may be invested up to 100% of its net asset value in money market instruments.
- The Fund may make significant use of derivatives (complex instruments) in order to (i) reduce the risk and/or generate additional capital or income and/or (ii) meet the Fund's investment objectives by generating varying amounts of leverage (i.e. where the Fund gains market exposure in excess of the net asset value of the Fund).
- The Fund is actively managed and is not constrained by its benchmark, the 3 Month US T-Bills Index, which is used for comparison purposes. As the benchmark is a proxy for a money market rate, the overlap is not applicable.
- The Fund promotes environmental, social and governance (ESG) criteria as covered under Article 8 of the Regulation (EU) 2019/2088 on sustainability-related disclosures in the financial services sector.
- You can buy and sell shares in the Fund on any Dealing Day (as defined in the Prospectus).
- Any income from your investment will be paid annually.

The Fund is intended for investors aiming for a positive total return over a market cycle, who may not have specific financial expertise but are able to make an informed investment decision based on this document and the Prospectus, have a risk appetite consistent with the risk indicator displayed below and understand that there is no capital guarantee or protection (100% of capital is at risk).

What are the risks and what could I get in return?

Risk Indicator

The risk indicator assumes that you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is a medium-low risk class.

This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact the capacity of the PRIIPs manufacturer to pay you.

Be aware of currency risk. In some circumstances, you may receive payments in a different currency from your local currency, so the final return you will get may depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Other risks such as Liquidity, Distressed Securities, Contingent Convertibles, Russia, Bond Connect, ESG and Derivatives risks may impact the Fund. Please refer to the Prospectus for more details.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance Scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable benchmark over the last 10 years. Markets could develop very differently in the future.
